

SIGNAL

**DETECT WHERE ELIGIBLE PATIENTS ARE EMERGING.
IDENTIFY TREATING HCPS WITHIN 24 HOURS.**

OVERVIEW

Retrospective data and delayed reporting show you the opportunities you may have already missed. Signal identifies therapy-relevant diagnostic events within 24 hours and links them to the treating HCP. That intelligence can move straight into your commercial workflows, helping teams act while treatment decisions are still being shaped.

Diagnostic intelligence

Powered by Reveal, our intelligence engine, drawing data from over 600+ connected labs across academic, community, and commercial settings.

The result

Enable more eligible patients to receive treatment.

BENEFITS

DETECT

Identify therapy opportunities before they're missed.

Surface clinically significant diagnostic events as they emerge—before treatment decisions are locked in.

TARGET

Focus effort on clinical activity.

Connect diagnostic events directly to the treating HCP, enabling targeting based on observed patient activity rather than modeled intent.

ACTIVATE

Move at clinical speed.

Enable action within hours, delivering intelligence into workflows, and omnichannel outreach before a treatment decision has been made.

IMPACT & OUTCOMES

- Identify more patients.

→ Find eligible patients in as little as 24 hours of a diagnostic result to enable engagement at the point of active patient management.
- Drive market growth.

→ Draw on 600+ connected US diagnostic labs and wider clinical sources to build a real-world view of the patient journey.
- Support more precise HCP targeting.

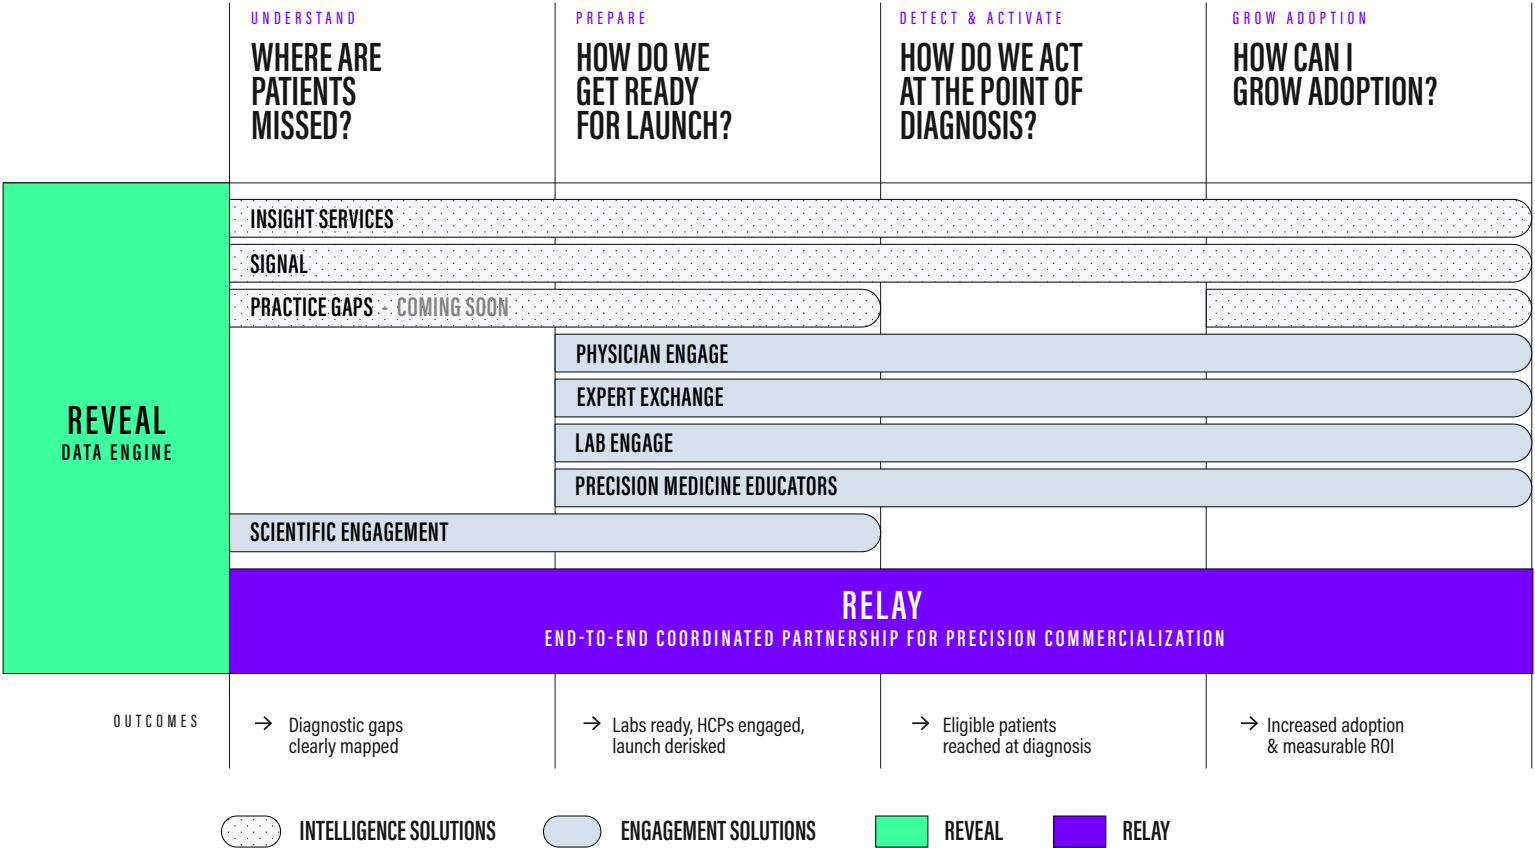

→ Link diagnostic activity to the treating HCP, so teams prioritize engagement around active patient need.
- Empower teams with decision-ready intelligence.

→ Increased visibility and adoption through embedded insights into CRM and marketing workflows.
- Identify more patients for the same spend.

→ Feed Signal into field and omnichannel workflows, so teams know where to focus outreach and development.

PRODUCT ECOSYSTEM

Signal is a Diaceutics Intelligence Solution—providing real-time event detection for commercial teams. It turns therapy-relevant diagnostic results into intelligence you can act on.

Reach HCPs when it counts. Talk to our team today.
